Location	This position is expected to work from Wellington Hospital. From time to time as part of Variance Response you may be required to work in other areas.

Te Whatu Ora

The Health System in Aotearoa is entering a period of transformation as we implement the Pae Ora/Healthy Futures vision of a reformed system where people live longer in good health, have improved quality of life, and there is equity between all groups.

We want to build a healthcare system that works collectively and cohesively around a shared set of values and a culture that enables everyone to bring their best to work and feel proud when they go home to their whānau, friends and community. The reforms are expected to achieve five system shifts. These are:

1. The health system will reinforce Te Tiriti principles and obligations
2. All people will be able to access a comprehensive range of support in their local communities to help them stay well
3. Everyone will have equal access to high quality emergency and specialist care when they need it
4. Digital services will provide more people the care they need in their homes and communities
5. Health and care workers will be valued and well-trained for the future health system

Context

Capital, Coast & Hutt Valley district provides hospital and health services in primary, secondary and tertiary healthcare to a total population base of approximately 445,000 citizens.

We are accountable for meeting the needs of and improving health outcomes for all the constituent populations of our district, and the region more broadly. Together we:

- provide secondary and tertiary, medical and surgical hospital services alongside community based health care
- fund local health providers and work collaboratively with the community to create and support multiple health education initiatives and projects within the region
- deliver health services directly as well as contracting external providers
- provide local, sub-regional, regional and national health services as well as community-based health, rehabilitation and support services.

The majority of the district's population live in Wellington and Lower Hutt. The Māori and Pacific populations of Lower Hutt and Wellington are proportionally similar, with the largest Pacific population in the region in Porirua. Kapiti and Upper Hutt have similar numbers of Māori and Pacific people. Most people are enrolled with a GP near their place of residence, so the increasing focus on community-based healthcare is expected to lead to better health outcomes for these population groups. Hutt Hospital provides secondary and some tertiary, medical and surgical hospital services alongside community based health care from its main facility in Lower Hutt City. In addition to funding local health providers and working collaboratively with the community to create and support multiple health education initiatives and projects, Hutt Hospital is the centre for five tertiary regional and sub-regional services - Plastics, Maxillofacial and Burns Services; Rheumatology; Dental Services; Regional Public Health; and Regional (Breast and Cervical) Screening Services.

Wellington Regional Hospital in Newtown is the region's main tertiary hospital with services such as complex specialist and acute procedures, intensive care, cardiac surgery, cancer care, neurosurgery and renal care. The hospital is the key tertiary referral centre for the lower half of the North Island and the upper half of the South Island.

Te Wao Nui, the Child Health Service for the Wellington Region and Central New Zealand based in the new purpose built children's hospital on the Wellington Regional Hospital campus, supports babies to adolescents with medical conditions or who may need paediatric surgery. It provides both hospital and outpatient services.

Women's Health Services provide tertiary level maternity care in Wellington and Hutt Regional Hospitals and a Primary Birthing Unit in Kenepuru. The provision of services from Women's Health encompass community-based primary LMC care and breastfeeding support, and tertiary level obstetrics, gynaecology, and other specialist services.

Kenepuru Community Hospital and Kapiti Health Centre provide secondary and community services based in Porirua and the Kapiti Coast

MHAIDS is the mental health, addictions and intellectual disability service for the Wairarapa District and Capital, Coast & Hutt Valley District, with multiple specialist facilities. Ratonga Rua-o- Porirua is our forensic, rehabilitation and intellectual disability inpatient unit.

Te Tiriti o Waitangi and Māori Health Outcomes

Māori are the indigenous peoples of Aotearoa. We have particular responsibilities and accountabilities through this founding document of Aotearoa. We value Te Tiriti and have adopted the following four goals, developed by the Ministry of Health, each expressed in terms of mana and the principles of:

Mana whakahaere	Effective and appropriate stewardship or kaitiakitanga over the health and disability system. This goes beyond the management of assets or resources.
Mana motuhake	Enabling the right for Māori to be Māori (Māori self-determination); to exercise their authority over their lives, and to live on Māori terms and according to Māori philosophies, values and practices including tikanga Māori.
Mana tāngata	Achieving equity in health and disability outcomes for Māori across the life course and contributing to Māori wellness.
Mana Māori	Enabling Ritenga Māori (Māori customary rituals) which are framed by Te Aō Māori (the Māori world), enacted through tikanga Māori (Māori philosophy & customary practices) and encapsulated within mātauranga Māori (Māori knowledge).

We will target, plan and drive our health services to create equity of health care for Māori to attain good health and well-being, while developing partnerships with the wider social sector to support whole of system change.

The Vision, Mission and Values from our District

We bring forward and join our values within our district. These will change as we become a team of teams within Te Whatu Ora.

Hutt Valley

Vision

Whanau Ora ki te Awakairangi: Healthy people, healthy families and healthy communities are so interlinked that it is impossible to identify which one comes first and then leads to another.

Mission

Working together for health and wellbeing.

Ō mātou uara – Values

Mahi Pai 'Can do': Mahi Tahi in Partnership: Mahi Tahi Te Atawhai Tonu Always caring and Mahi Rangatira being our Best

Capital and Coast

Vision

Keeping our community healthy and well

Mission

Together, Improve the Health and Independence of the People of the District

Value

Manaakitanga – Respect, caring, kindness
Kotahitanga – Connection, unity, equity
Rangatiratanga – Autonomy, integrity, excellence

District Responsibility

The district leadership have collective accountability for leading with integrity and transparency a progressive, high performing organisation, aimed at improving the health and independence of the community we serve and achieving equitable outcomes for all. The leadership team are responsible for achieving this aim, aligned with our Region, within the available resources, through a skilled, empowered, motivated and supported workforce in line with government and HNZ policy.

Te Whatu Ora is committed to Te Tiriti o Waitangi principles of partnership, participation, equity and protection by ensuring that guidelines for employment policies and procedures are implemented in a way that recognises Māori cultural practices.

We are committed to supporting the principles of Equal Employment Opportunities (EEO) through the provision and practice of equal access, consideration, and encouragement in the areas of employment, training, career development and promotion for all its employees.

Clinical Trials Unit Perspective

The Clinical Trials Unit (CTU) is part of the Wellington Blood and Cancer Centre and operates under the governance of the Clinical Research Committee who act as a Board of Trustees for the trust funds financing research activities. Staff in the unit coordinate pharmaceutical industry and collaborative group clinical trials. The staff who are comprised of registered nurses and allied health professionals, also protocol related documentation preparation, submissions to regulatory bodies and completion of documentation to ensure compliance with Ministry of Health and Good Clinical Practice and appropriate national/international regulations.

The Unit works in collaboration with the Clinical Research Unit.

Purpose of the role

All nurses employed by Te Whatu Ora will have registration with the New Zealand Nursing Council and maintain a current annual practising certificate as a Registered Nurse. Application onto the Professional Development and Recognition Programme (PDRP) at proficient or expert level is required.

The Research Nurse works with Medical Oncology, Radiation Oncology and Haematology Teams to coordinate the medical oncology, radiation oncology and haematology trials. The role is supported by the CTU infrastructure as well as the Wellington Blood and Cancer Centre.

The Research Nurse is involved with trial management, regulatory approval process, data collection and patient care. This position works as part of the team at the Clinical Trials Unit and is responsible for facilitation and coordination of clinical trials and to ensure patients are well informed and prepared for interventions in a timely and efficient manner. The role holder will be responsible for overseeing clinical trial related activity within Oncology Services and performing specific clinical trial related activities, as specified in trial protocols on patient being treated in clinical trials.

The role holder will be able to work well independently and as an integral part of a team in a clinical capacity. They will have the ability to collect accurate clinical, medical and lifestyle information, mobilise resources and plan care to meet the individual needs of the participants. A function of the role is to assist physicians and scientist in monitoring the health responses of patients during a new drug or therapy trial. This will include recoding physical assessments and vital signs; administration of the investigated compounds or therapies and to coordinate research activities.

Communication and liaison with staff is essential in this role to ensure patients receive optimal education, assessment and intervention. This role must ensure the coordination of the daily operational requirements and requires a strong knowledge of standards, processes and policies,

It essential that the role holder demonstrates a good understanding and commitment to working with:

- Good Clinical Research Practice
- the declaration of Helsinki

All work undertaken will have Ethics Committee approval and appropriate communication, regarding study developments, will be maintained with the Ethics Committee.

Key Accountabilities

The following role accountabilities may evolve with organisational change and there may be additional duties, relevant to this position that will be required to be performed from time to time.
