Location	This position is expected to work Kenepuru and Wellington hospitals. From time to time as part of Variance Response you may be required to work in other areas.

Te Whatu Ora

The Health System in Aotearoa is entering a period of transformation as we implement the Pae Ora/Healthy Futures vision of a reformed system where people live longer in good health, have improved quality of life, and there is equity between all groups.

We want to build a healthcare system that works collectively and cohesively around a shared set of values and a culture that enables everyone to bring their best to work and feel proud when they go home to their whānau, friends and community. The reforms are expected to achieve five system shifts. These are:

1. The health system will reinforce Te Tiriti principles and obligations
2. All people will be able to access a comprehensive range of support in their local communities to help them stay well
3. Everyone will have equal access to high quality emergency and specialist care when they need it
4. Digital services will provide more people the care they need in their homes and communities
5. Health and care workers will be valued and well-trained for the future health system

Context

Capital, Coast & Hutt Valley district provides hospital and health services in primary, secondary and tertiary healthcare to a total population base of approximately 445,000 citizens.

We are accountable for meeting the needs of and improving health outcomes for all the constituent populations of our district, and the region more broadly. Together we:

- provide secondary and tertiary, medical and surgical hospital services alongside community based health care
- fund local health providers and work collaboratively with the community to create and support multiple health education initiatives and projects within the region
- deliver health services directly as well as contracting external providers
- provide local, sub-regional, regional and national health services as well as community-based health, rehabilitation and support services.

The majority of the district's population live in Wellington and Lower Hutt. The Māori and Pacific populations of Lower Hutt and Wellington are proportionally similar, with the largest Pacific population in the region in Porirua. Kapiti and Upper Hutt have similar numbers of Māori and Pacific people. Most people are enrolled with a GP near their place of residence, so the increasing focus on community-based healthcare is expected to lead to better health outcomes for these population groups. Hutt Hospital provides secondary and some tertiary, medical and surgical hospital services alongside community based health care from its main facility in Lower Hutt City. In addition to funding local health providers and working collaboratively with the community to create and support multiple health education initiatives and projects, Hutt Hospital is the centre for five tertiary regional and sub-regional services - Plastics, Maxillofacial and Burns Services; Rheumatology; Dental Services; Regional Public Health; and Regional (Breast and Cervical) Screening Services.

Wellington Regional Hospital in Newtown is the region's main tertiary hospital with services such as complex specialist and acute procedures, intensive care, cardiac surgery, cancer care, neurosurgery and renal care. The hospital is the key tertiary referral centre for the lower half of the North Island and the upper half of the South Island.

Te Wao Nui, the Child Health Service for the Wellington Region and Central New Zealand based in the new purpose built children's hospital on the Wellington Regional Hospital campus, supports babies to adolescents with medical conditions or who may need paediatric surgery. It provides both hospital and outpatient services.

Women's Health Services provide tertiary level maternity care in Wellington and Hutt Regional Hospitals and a Primary Birthing Unit in Kenepuru. The provision of services from Women's Health encompass community-based primary LMC care and breastfeeding support, and tertiary level obstetrics, gynaecology, and other specialist services.

Kenepuru Community Hospital and Kapiti Health Centre provide secondary and community services based in Porirua and the Kapiti Coast

MHAIDS is the mental health, addictions and intellectual disability service for the Wairarapa District and Capital, Coast & Hutt Valley District, with multiple specialist facilities. Ratonga Rua-o- Porirua is our forensic, rehabilitation and intellectual disability inpatient unit.

Te Tiriti o Waitangi and Māori Health Outcomes

Māori are the indigenous peoples of Aotearoa. We have particular responsibilities and accountabilities through this founding document of Aotearoa. We value Te Tiriti and have adopted the following four goals, developed by the Ministry of Health, each expressed in terms of mana and the principles of:

Mana whakahaere	Effective and appropriate stewardship or kaitiakitanga over the health and disability system. This goes beyond the management of assets or resources.
Mana motuhake	Enabling the right for Māori to be Māori (Māori self-determination); to exercise their authority over their lives, and to live on Māori terms and according to Māori philosophies, values and practices including tikanga Māori.
Mana tāngata	Achieving equity in health and disability outcomes for Māori across the life course and contributing to Māori wellness.
Mana Māori	Enabling Ritenga Māori (Māori customary rituals) which are framed by Te Aō Māori (the Māori world), enacted through tikanga Māori (Māori philosophy & customary practices) and encapsulated within mātauranga Māori (Māori knowledge).

We will target, plan and drive our health services to create equity of health care for Māori to attain good health and well-being, while developing partnerships with the wider social sector to support whole of system change.

The Vision, Mission and Values from our District

We bring forward and join our values within our district. These will change as we become a team of teams within Te Whatu Ora.

Hutt Valley

Vision

Whanau Ora ki te Awakairangi: Healthy people, healthy families and healthy communities are so interlinked that it is impossible to identify which one comes first and then leads to another.

Mission

Working together for health and wellbeing.

Ō mātou uara – Values

Mahi Pai 'Can do': Mahi Tahi in Partnership: Mahi Tahi Te Atawhai Tōnu Always caring and Mahi Rangatira being our Best

Capital and Coast

Vision

Keeping our community healthy and well

Mission

Together, Improve the Health and Independence of the People of the District

Value

Manaakitanga – Respect, caring, kindness
Kotahitanga – Connection, unity, equity
Rangatiratanga – Autonomy, integrity, excellence

District Responsibility

The district leadership have collective accountability for leading with integrity and transparency a progressive, high performing organisation, aimed at improving the health and independence of the community we serve and achieving equitable outcomes for all. The leadership team are responsible for achieving this aim, aligned with our Region, within the available resources, through a skilled, empowered, motivated and supported workforce in line with government and HNZ policy.

Te Whatu Ora is committed to Te Tiriti o Waitangi principles of partnership, participation, equity and protection by ensuring that guidelines for employment policies and procedures are implemented in a way that recognises Māori cultural practices.

We are committed to supporting the principles of Equal Employment Opportunities (EEO) through the provision and practice of equal access, consideration, and encouragement in the areas of employment, training, career development and promotion for all its employees.

Service Perspective

The Gastroenterology Service is a secondary and tertiary service provided for Capital & Coast DHB and those of the central region of New Zealand. The service provides acute and elective gastroenterology and hepatology in-patient and outpatient services at Wellington and Kenepuru Hospitals. It provides tertiary services to the central region, including EUS, ERCP and POEM. These services are provided 24 hours a day, 7 days a week.

Nursing staff also provide support for elective and acute paediatric endoscopy in the main operating theatres.

The service is mainly delivered in the outpatient setting although a small percentage of people are treated as in-patients. Many of the procedures provided are endoscopic. The full range of upper and lower GI diagnostic and therapeutic endoscopic services are offered. These procedures may be diagnostic or combined diagnostic and therapeutic services. The therapeutic procedures often reduce in-patient admission periods, including reducing periods in ICU (for example by stopping Gastrointestinal (GI) bleeding), and reducing the need for surgery and hence reducing post-operative morbidity and recovery times. Some procedures also offer acceptable and cost effective palliation of malignancies.

The department provides specialist hepatology management for patients with liver disease including hepatitis B and C and pre and post-liver transplantation.

Gastroenterology at CCDHB includes:

- Outpatient Clinics
- Endoscopy Services, providing the following procedures:
 - Gastroscopy
 - Colonoscopy
 - ERCP
 - EUS
 - Capsule endoscopy
- Hepatology
- Inflammatory Bowel Service
- Bowel Screening
- Manometry
- Alimetry

Role Purpose

The Clinical Nurse Specialist (CNS) uses in-depth knowledge to provide patient care and expertise with a Bowel Screening focus within the Districts Gastroenterology Departments. The CNS works in a specialised practice area with more knowledge and skills than a speciality clinical nurse (SCN). This role enhances health outcomes for patients and their whānau by working directly with them to provide assessment, care and education.

The CNS Bowel Screening has an overarching responsibility to both the Wellington and the Hutt Valley Bowel screening teams, and is required to work across all 3 sites within the district – Hutt Valley Hospital, Kenepuru Hospital and Wellington Regional Hospital.

As a senior nurse, the CNS contributes to service specific pathways, protocols and guidelines that reflect best practice, in accordance with current evidence to ensure high levels of safe care.

The CNS Bowel Screening is responsible for providing support and expert advice to other members of the healthcare team, both within the Bowel Screening team, as well as to the wider hospital teams, on all aspects of the bowel screening programme. This includes, but not restricted to, the Bowel Screening Speciality Clinical Nurses, the Colorectal Clinical Nurse Specialists and other healthcare providers involved with the National Bowel Screening Programme (NBSP). It is anticipated that the CNS Bowel Screening will support patients through the entire pathway, from positive test to diagnostic investigations, and to treatment.

Achieving equity will be a key focus of this role, and the CNS Bowel Screening will work with the districts' Māori and Pacific Bowel Screening Co-ordinators to promote equitable participation and access to the programme

The CNS will respond to the changing needs of the District, performing other tasks as required. The CNS is expected to contribute to the implementation of District and nursing goals and values, and to promote Te Whatu Ora – Health New Zealand Capital, Coast and Hutt Valley as a centre of excellence for nursing practice.

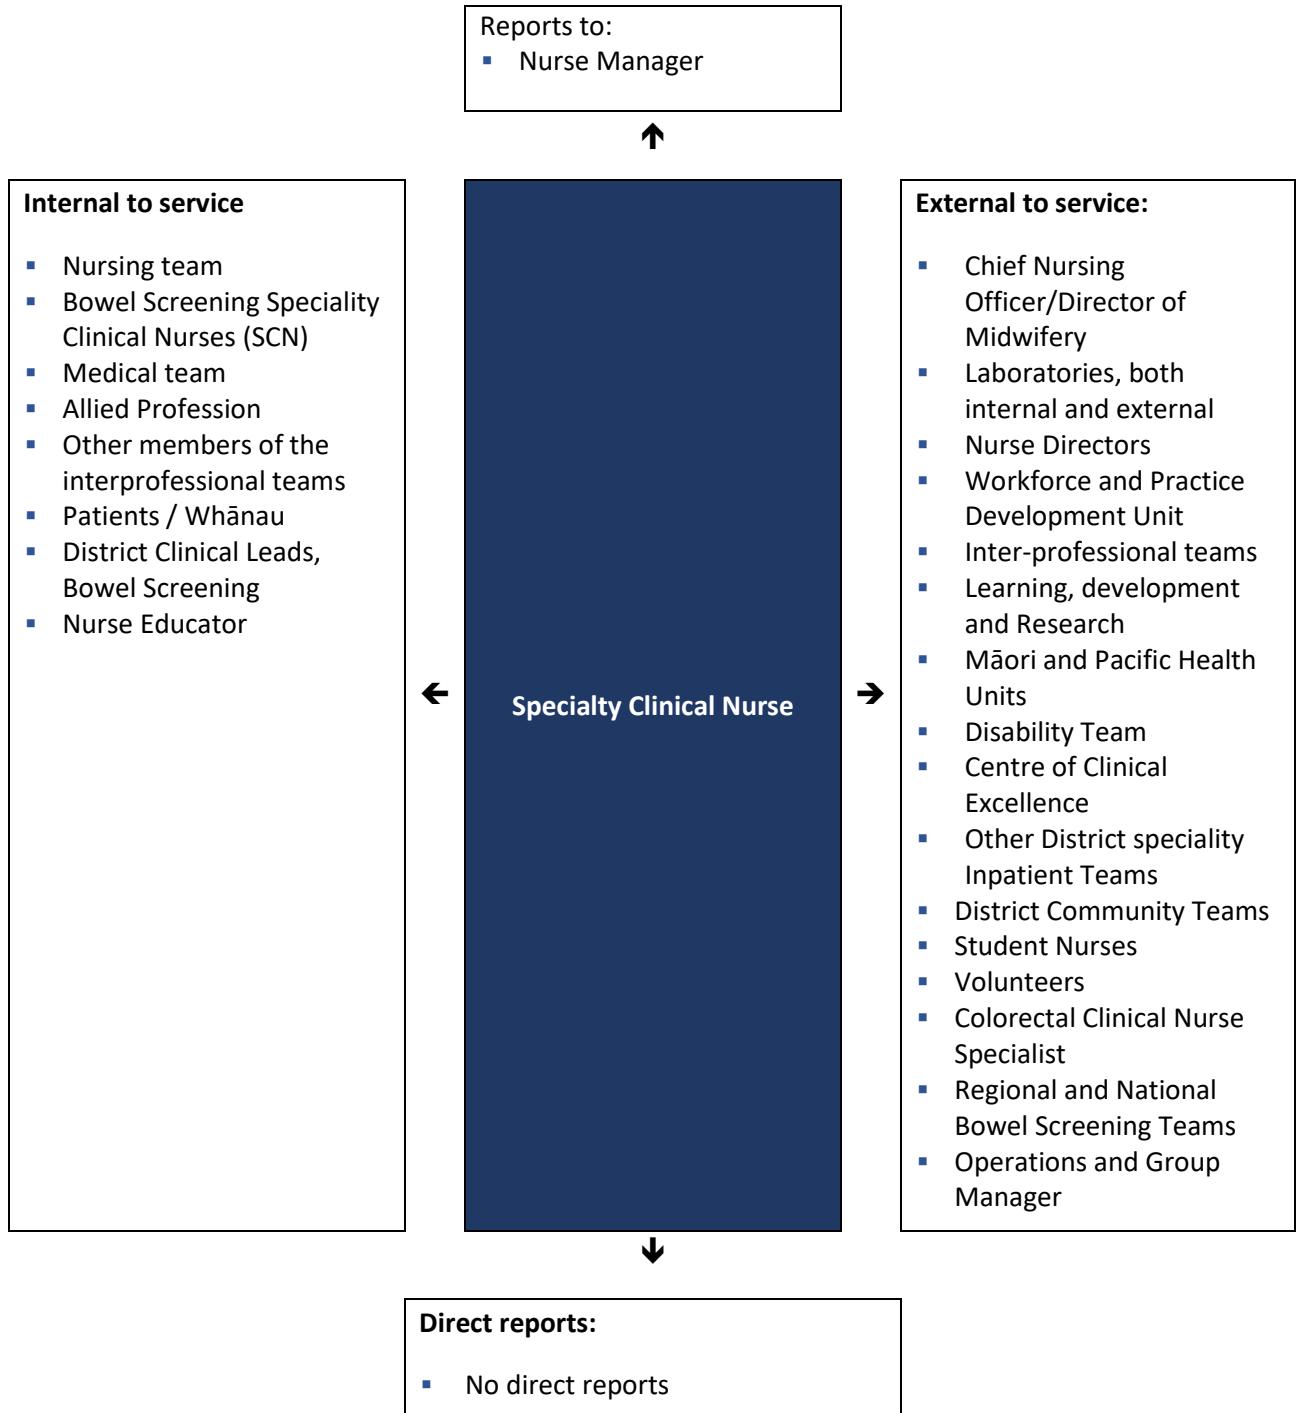

Key Accountabilities

All Registered Nurses (RN) nurses employed by Capital, Coast & Hutt Valley District will have registration with the New Zealand Nursing Council (NCNZ), will fulfil all registered nursing competencies and maintain a current RN annual practising certificate. Application onto the Professional Development and Recognition Programme (PDRP) at Senior Expert pathway is required.
